

Primaria Deta

MONTHLY AIR-QUALITY REPORT

Timp de la: 01/11/2025, 00:00

Timp până la: 30/11/2025, 23:59

Numele dispozitivului: Primaria Deta

Locația dispozitivului: Strada Aurel Vlaicu 2, Deta, Romania

Parametrii: EAQI, NO₂, O₃, SO₂, PM_{2.5}, PM₁₀, Wind Speed, Wind Direction, CO, R. Humidity, PM₁, PM₁₀₀, Pressure, Temperature

Media indicelui de calitate al aerului (ICA): 363

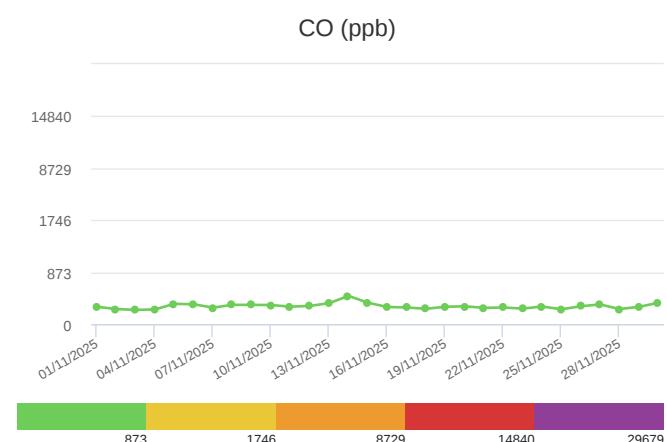

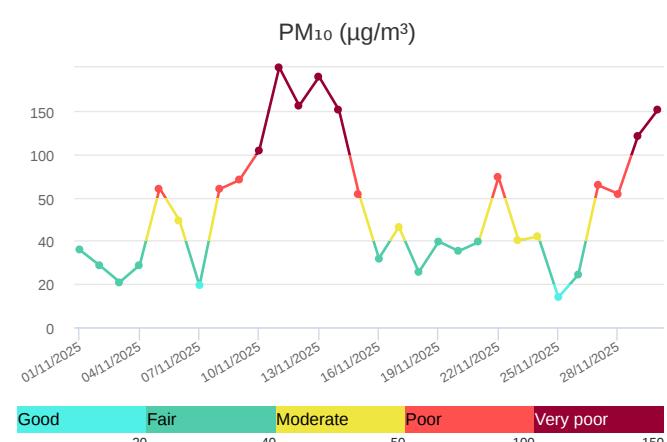

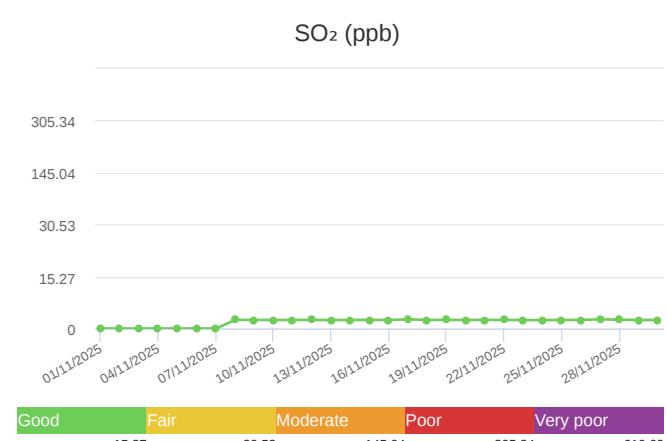

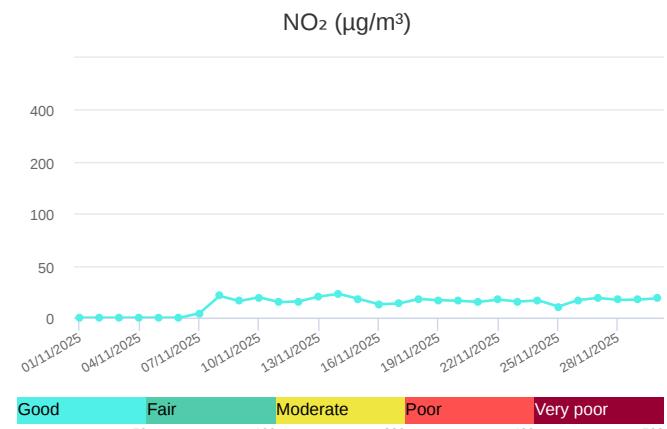

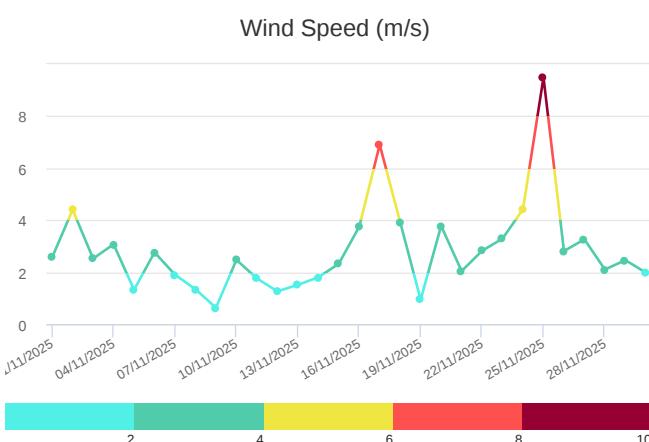

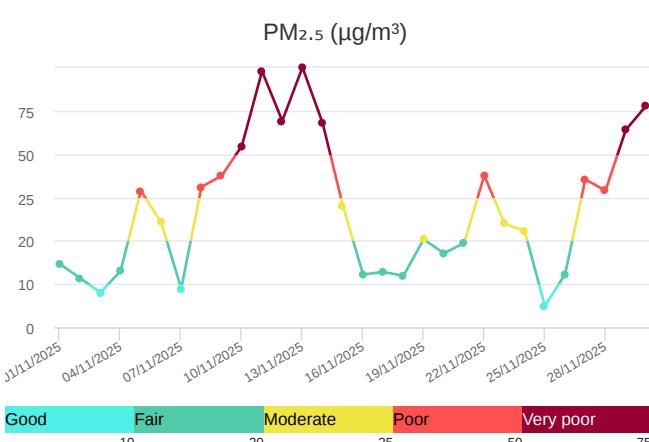

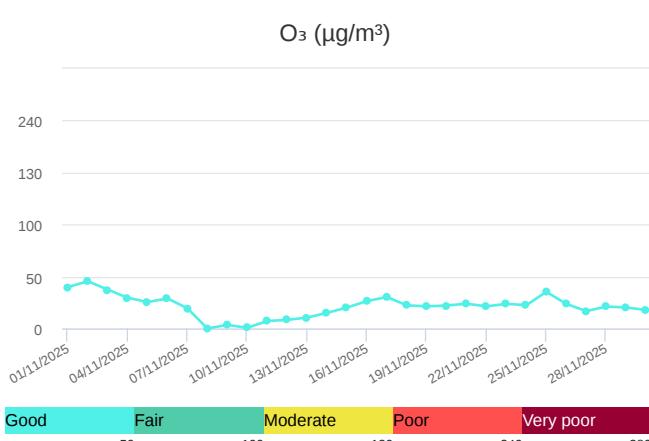

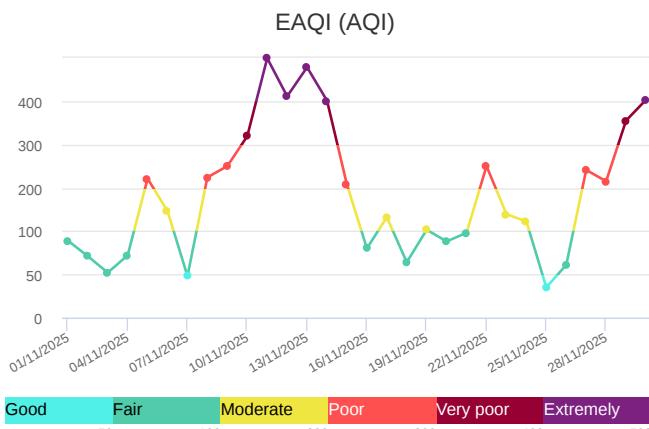

Prezentare generală zilnică: Parametrii indicelui de calitate al aerului (ICA)

	EAQI AQI	NO ₂ µg/m ³	O ₃ µg/m ³	SO ₂ ppb	PM _{2.5} µg/m ³	PM ₁₀ µg/m ³

Insights

- 14/11/2025, 23:59 **EAQI reached extremely poor levels during mid-November.**: The Environmental Air Quality Index (EAQI) peaked at extremely poor levels, exceeding 400 on multiple days, with the highest recorded value of 499.
- 30/11/2025, 23:59 **PM_{2.5} concentrations frequently exceeded safe limits.**: PM_{2.5} concentrations frequently exceeded the 'Poor' threshold (25 µg/m³) indicating a significant health risk. Highest reading was at 258.67 µg/m³.
- 13/11/2025, 23:59 **PM₁₀ values spiked dramatically in early to mid November**: PM₁₀ levels reached extremely poor values, peaking at 1194.08 µg/m³, far exceeding the upper limit of the 'Very Poor' range (150 µg/m³).
- 30/11/2025, 23:59 **NO₂ concentrations mostly within 'Good' to 'Fair' zones**: NO₂ concentrations remained relatively low, mostly within the 'Good' (0-21.26 µg/m³) and 'Fair' (21.26-47.83 µg/m³) ranges, except for few spikes.
- 30/11/2025, 23:59 **O₃ levels fluctuated, with most values in fair-moderate range.**: Ozone (O₃) levels fluctuated, with most values falling within the 'Fair' (25.47-50.94 µg/m³) to 'Moderate' (50.94-66.22 µg/m³) range.
- 30/11/2025, 23:59 **SO₂ levels remained consistently low throughout the month.**: Sulfur Dioxide (SO₂) levels consistently remained low, staying within the 'Good' range (0-38.17 ppb) throughout the entire period.
- 30/11/2025, 23:59 **High EAQI days correlate with elevated PM_{2.5} and PM₁₀ levels.**: Days with 'Poor' to 'Extremely Poor' EAQI values strongly correlate with increased concentrations of both PM_{2.5} and PM₁₀ particulate matter.
- 30/11/2025, 23:59 **Wind speed shows some relationship with air quality changes.**: There appears to be a moderate correlation between wind speed and improvements in air quality, higher speed may disperse pollutants.
- 30/11/2025, 23:59 **Temperature appears to inversely correlate with EAQI**: EAQI appear to be higher when the temperatures are low. The lowest temperature was at 2.62 °C and highest EAQI was recorded as 478.
- 30/11/2025, 23:59 **R. Humidity increase correlates with PM_{2.5} and PM₁₀ increase.**: There may be a correlation between increased relative humidity and increased concentrations of PM_{2.5} and PM₁₀, particularly on days with poorer air quality.
- 07/11/2025, 23:59 **November 7th registered the best Air Quality of the Month.**: November 7th showed the best air quality of the whole month. with an EAQI value of 48 (Good). All pollutant parameters was at a safe level.
- 30/11/2025, 23:59 **Pressure appears to inversely correlate with EAQI**: The atmospheric pressure tend to drop during the days EAQI is high. For example, on 2025-11-17T21:59:59.000Z atmospheric pressure drops to 998.11 HPa.
- 30/11/2025, 23:59 **The daily average CO concentration remained stable.**: Daily average Carbon Monoxide concentration remained stable. The highest concentration reported was 472.74 ppb on 2025-11-14T21:59:59.000Z.
- 13/11/2025, 23:59 **Extremely high PM₁₀₀ levels coincide with poor EAQI**: Elevated PM₁₀₀ values, such as 2281.7 µg/m³ on 2025-11-11T21:59:59.000Z, correlate with extremely poor EAQI, contributing to overall air quality degradation.
- 07/11/2025, 23:59 **Good Air Quality on 2025-11-07T21:59:59.000Z**: On November 7th, all the air quality parameters were the lowest of the month, with EAQI being 48, indicating 'Good' air quality.
- 30/11/2025, 23:59 **Air Quality deterioration towards end of the month**: EAQI values shows a deteriorating trend towards end of the month, with air quality falling in 'Very poor' and 'Extremely poor' zones.
- 30/11/2025, 23:59 **PM₁ concentration correlates with PM_{2.5} and PM₁₀ levels.**: The trend shows that PM₁ levels increases with increase in PM_{2.5} and PM₁₀ levels. On 2025-11-11T21:59:59.000Z PM₁ reaches to its peak.
- 30/11/2025, 23:59 **O₃ shows consistently low concentrations.**: Ozone concentration recorded was low with a value of 0 µg/m³ on multiple occasions. High ozone days were recorded in the first week.
- 30/11/2025, 23:59 **EAQI and EAQI (AQI) are identical**: The values for EAQI column is identical to EAQI (AQI) for each day. This observation eliminates the necessity to perform two distinct calculations.
- 30/11/2025, 23:59 **Battery levels remained constant**: The battery percentage of the monitoring device remained constant at 100% throughout the entire month. There was no recorded drop.
- 07/11/2025, 23:59 **NO₂ reached Good air quality levels.**: The NO₂ values observed were in good air quality levels. The concentration value of 0 µg/m³ was recorded on multiple days.
- 30/11/2025, 23:59 **Fluctuation observed for all particulate matter.**: The particulate matter like PM_{2.5}, PM₁₀ and PM₁₀₀ fluctuated across the month. There was no fixed pattern for these particulate matters.
- 30/11/2025, 23:59 **Wind Direction and Speed may be related to air quality.**: Further analysis should be done to see how wind direction and speed impact the pollutant concentration and air quality in general.
- 05/11/2025, 23:59 **Increased concentration of O₃ on November 5th.**: On November 5th the concentration of O₃ recorded was 50 µg/m³, which classifies as a moderate zone according to the air quality ranges.
- 16/11/2025, 23:59 **Air quality was fair on November 16th.**: The air quality was fair on November 16th, where the AQI category was in the fair range. The EAQI on that day was 80.
- 30/11/2025, 23:59 **SO₂ was almost at zero on most days.**: Sulfur Dioxide (SO₂) levels recorded was close to 0 on most days, however, on the November 27th, 2025 the value was 2.71.
- 25/11/2025, 23:59 **Air quality improved on November 25th.**: The air quality was fair on November 25th. The particulate matters PM_{2.5}, PM₁₀ and PM₁ were at its lowest levels.

- 30/11/2025, 23:59 **Temperature may have a negative impact on PM2.5 levels**: Further analysis is needed to verify the correlation between temperature and PM2.5. However, on several occasions when temperature drops PM2.5 levels go up.
- 30/11/2025, 23:59 **Poor air quality days observed with low wind speed**: Further investigation needs to be done to analyze the correlation between wind speed and air quality. On very poor air quality days, the wind speed was very low.
- 11/11/2025, 23:59 **November 11th, 2025 has peak PM10 values**: On November 11th, 2025 at 21:59:59.000Z PM10 values was at its peak. The concentration was 1194.08 µg/m³.
